Everybody Down

Nonpoint

When I drop you, I'm gonna stomp you
Pick you up again and then drop you
Lift my foot again and then stomp you
Then grind
And when I stomp you
That'll be the end of you
That'll be it
That'll be the end of you
Time to jump ship
Cause I'm a psycho and I'm crazy
And If you're too close you're gonna get hit

Everybody down
I'm coming around
Everybody down
I need every single person right now on the ground
Everybody down I'm coming around
Everybody down I need every single person right now on the ground

Now that I got you
Right where I want you
I'm gonna twist you up and tie you up and knot you
Break you, so that it takes you

6 months to recuperate you
Thats the end of you
Thats it
Thats the end of you
Time to jump ship
Cause I'm a psycho and I'm crazy
And If you're too close you're gonna get hit

Everybody down
I'm coming around
Everybody down
I need every single person right now on the ground
Everybody down
I'm coming around
Everybody down
I need every single person right now on the ground
