

Mind over Matter

Iron Savior

Am I alive, do I exist
Am I the goddess of justice
A body of metal, a mind made of circuits
Although I think and I'm conscious
What is my species, where is my soul
or am I dead as a rock Is this my spirit or just a program
written on memory blocks What is my aim
I am what can't be
A mind in a digital brain It is the mind, mind over matter
The power has brought me to live
In lakes of doubts and oceans of my questions
I had to dive
Give me guidance, in torrents of time
Give me answers, creators of mine from the past
Mind over matter at last So much to learn, so much to see
So many things to explore
Too little I know, am I a being
or just a failure at all Please heal my pain
The silence of ungiven answers
will drive me insane It is the mind, mind over matter Conscious or dead, beginning or end
Mind of circuits, heal the pain
Going insane, lakes of doubts
Torrents of time, oceans of questions
Creators of mine
Answers I need guidance I want
Conscious or dead, beginning or end It is the mind, mind over matter
