When I Was With You

Natalie

When I was with you, everything felt right in my life
When I was with you, I was so proud to be by your side
When I was with you, I was loving you with all my might
When I was with you, when I was with you
Boy, now I'm sitting here and I'm thinking about back in the days
When you held me in your arms where you take me away
Back to those days that we had before
I'm not your girl anymoreI remember when you used to say
That you love me and you'd always stay
By my side, that you'd never leave me boy
So tell me why thing suddenly changed
Now here we are, on and off again
Don't wanna do it no more, I can't pretend
Like you didn't take a part of me with you
And now I can't stop thinkin' throughWhen I was with you, everything felt right in my life
When I was with you, I was so proud to be by your side
When I was with you, I was loving you with all my might
When I was with you, when I was with you
Boy, now I'm sitting here and I'm thinking about back in the days
When you held me in your arms where you take me away
Back to those days that we had before
I'm not your girl anymoreIt's not the same, it ain't feelin' right
These memories that got your girl awake at night
I'm staying up waiting for phone calls
Doing nothing at all
It's getting harder to keep up with the fight
Still I wonder if you miss me
My days are over feelin' empty
You got me wishin' everyday you'd bring back my soul
Beacuse of you nothing let me goWhen I was with you, everything felt right in my life
When I was with you, I was so proud to be by your side
When I was with you, I was loving you with all my might
When I was with you, when I was with you
Boy, now I'm sitting here and I'm thinking about back in the days
When you held me in your arms where you take me away
Back to those days that we had before
I'm not your girl anymoreIf I could be your girl, and you would be my man
We'd still be together walking hand-in-hand
'Cause I was made for you, I think that you were made for me

Instead I keep thinking back to what we used to beIf I could be your girl, if you would be my man
We'd still be together walking hand-in-hand
'Cause I was made for you, I think that you were made for me
Instead I keep thinking back to what we used to beWhen I was with you, everything felt right in my life
When I was with you, I was so proud to be by your side
When I was with you, I was loving you with all my might
When I was with you, when I was with you
Boy, now I'm sitting here and I'm thinking about back in the days
When you held me in your arms where you take me away
Back to those days that we had before
I'm not your girl anymoreWhen I was with you, everything felt right in my life
When I was with you, I was so proud to be by your side
When I was with you, I was loving you with all my might
When I was with you, when I was with you
Boy, now I'm sitting here and I'm thinking about back in the days
When you held me in your arms where you take me away
Back to those days that we had before
I'm not your girl anymore
