Wind It Up

moe.

Be on my side, I'm on your side
This time and every time
We are the same kind
We share the same mindDo that today, meet me halfway
Meet me where the summer sets
Meet me where the water falls
Meet me where the music calls
And give the clock another windI'll meet you and that's unknown
We'll wind it up then let it go
I think you'll agree we're badder together
Then we are on our ownMeet me halfway
I've got more to say
There's no time like the presentI'm of the same kind
We share the same mind
Let's give the clock another windI'll meet you in that's hard, I know
We'll wind it up then let it go
I think you'll agree we're badder together
Than we are on our ownBe on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your sideBe on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your side
Be on my side, I'll be on your side
