All About Us

Jordan Fisher

Fly away with me baby
I been falling for days, been lost in the maze; I hope you can save me
Cause we're going higher
We could both touch the sky
Let's follow the sun's love

So let's start off like we'll never stop
Baby just be still; let your body talk to me
I'll give you everything you need
We could run away to get to the place, so let down your hair, baby set your mind at ease
We'll be living in a dream

Cause tonight, the stars are shining bright
The ride for you and I
No, it's not about luck
This is all about us, this is all about us
So why, don't we live if we're alive?
Gotta open up our eyes
No, it's not about luck
This is all about us, this is all about us

Fly away with me baby
Let me show you a world where pain don't exist
If you could begin to come with me for a minute, yeah
I'll give you the things I know you're finessing, oh

So let's start off like we'll never stop
Baby just be still; let your body talk to me (oh woah)
I'll give you everything you need (everything you need, yeah)
We could run away to get to the place, so let down your hair, baby set your mind at ease (set your mind)
We'll be living in a dream (cause tonight)

Cause tonight, the stars are shining bright
The ride for you and I
No, it's not about luck
This is all about us, this is all about us
So why, don't we live if we're alive?
Gotta open up our eyes
No, it's not about luck

This is all about us, this is all about us

It's a feeling that you'll get when you really love somebody
We can watch our two worlds colliding
(Hey, hey)
In the moment you were waiting by a voice we can't control it
And I think that now we know it, yeah

We could run away to get to the place, so let down your hair, baby set your mind at ease
We'll be living in a dream

Cause tonight, the stars are shining bright
The ride for you and I
No, it's not about luck
This is all about us, this is all about us
So why, don't we live if we're alive?
Gotta open up our eyes
No, it's not about luck
This is all about us, this is all about us
