Make It or Not

We the Kings

Take me where the sun
Dives into the ocean
Where we can spend
The night watching
the world spin chasing tails
made out of shining starts
well be alone
Together one more (night)
Together were alright
Cause we knowIf we make it or not
Well say we tried and fought
And we will stand up against the world
Well never look away from what they say
We beat the odds and made it through the dayRemember our first kiss
We made under
the night we felt alive
We knew that it was right
That kiss will live
Just like its breathing
and when everything seems lost
Just know youll find me there (yeah)
Youll find me there
Cause we knowIf we make it or not
Well say we tried and fought
And we will stand up against the world
Well never look away from what they say
We beat the odds and made it through the day(whoa)
I think well make it out ok
They all say we tried and fought
Through the crowds and turns
We know they never stopped
And we will stand up against the world
Well never look away from what they say
We beat the oddsIf we make it or not
Well say we tried and fought
And we will stand up against the world
Well never look away from what they say
We beat the odds and made it through the day
