Lost Love

Claude Challe

I carry with me all the love that you give
You brought me serenity, a reason to live
Our life is a journey that we took from the start
We made all these memories together
I can remember the first time that we met
The feelings you gave to me, I'll never forget
I knew from that moment when our love first began
We'd last till the end of time, forever
And though there were bad times
We stood by each other
And did what we had to get through
You live in my heart when you're far away
I see you in dreams where I hear you say
I'm with you forever in true love
By light of the day and stars above
And when there were bad times
We held on each other
To face what we had to get through
You live in my heart when you're far away
I see you in dreams where I hear you say
Look up to heaven and I'll be there
Still guiding your heart, still saying our prayer
