Dragonheart

Drakkar

So many hundreds of years ago a king was killed in a battle
Even his son was wounded to death, the only heir to the throne
The queen to save the life of the prince brought him to the dragon's lair
The dragon gave him a half of his heart, so he returned to life[chorus]
Knight and the dragon together will fight against the king of the evil
He has corrupted the old dragon's heart, and he will pay with his blood
Knight and the dragon together will fight, tryin' to put down the tyrant
They are the last hope for this land to live
To live in freedom againBut growing up the new king betrayed what he did swear to the dragon
Evil and liar he became a tyrant, killing and raping for joy
The knight who was his master of sword, one day did meet the old dragon
And with a priest and a girl on their side, they did begin the rebellion[chorus][The Ancient Code:]
A knight is sworn to Valour, is heart only knows the Virtue
His sword defends the oppressed ones and serves the TruthThe final battle is now taking place, there's only one way to win
To save the day, to kill the king, even the dragon must die
Great is the pain in the heart of the knight, striking the deadly blow
Draco and the king together they die, but the last dragon still smiles[chorus]
