The Key

The Skalatones

Out here there's a hole in the sky
Doors open to the other side
I saw a two headed dog fighting over a bone
Black haired woman turned into crows
I gotta take a step back and think this through
I gotta know it's true
I gotta know that I'm living in a dream
Is this what it seems? Gotta know anyone believes
How did I get lost? What's the final cost?
Could you please help me find the key?
Out here under the willow tree
Down deep is where you'll find the key
I've been here once before
Maybe in a dream thylacines play tambourine
I gotta take a step back and think this through
I gotta know it's true
I gotta know that I'm living in a dream
Is this what it seems? Gotta know anyone believes
How did I get lost? What's the final cost?
Could you please help me find the key?
Out here the saying goes off with the lights
And on with the show
Once it's dark the children play
They all join hands and dance around the grave
I gotta know that I'm living in a dream
Is this what it seems? Gotta know anyone believes
How did I get lost? What's the final cost?
Could you please help me find the key, find the key?
