With Me

Logan

Lay down and close your eyes
There's no time left to call your own
Reach for the stars
Oh, now I pray for you, yeahTell me to help myself
I can't take anymore
Go on all the days when
They turn their back on you, my friendAnd when you're with me
It all feels all right
And when you're with me
It all feels all rightSo close your eyes
And drift away
We'll meet again
Another dayTell me to help myself
I can't take anymore
Go on all the days when
They turn their back on you, my friendAnd when you're with me
It all feels all right
And when you're with me
It all feels all rightI remember talking
I remember what you said
I remember having you in my bedI remember thinking
We were gonna go far
But I never thought we'd reach the stars andAnd when this world falls down around you
And nobody even cares
I know you are always thereAnd when you're with me
It all feels all right
And when you're with me
It all feels all rightAnd when you're with me
It all feels all right
And when you're with me
It all feels all rightAnd when you're with me
It all feels all right
And when you're with me
It all feels all right
