# Classical Mechanics

## Azure Marl Void

Celestial mechanics of the Sun, Moon, and Earth;Â influence the love that I felt for them.Â Wherefore the storms surge beneath our veins;Â exchanging oxygen with carbon dioxide until we drown.Â In the waves of the ocean that turn their tides;Â time lapsing the rise and the fall in sea levels.Â Sicut amor, desiderat ad deus.Â An expansion of the universe whereÂ everything spins;Â such gravitational forces are beyond our control.Â Applying classical mechanics with quantum physics;Â exchanging macroscopic and astronomical solutions.Â With equations of time, space, and matter;Â rearrange for neither can be destroyed nor created.Â Sicut amor, desiderat ad deus.
