Radio waves

Pink Floyd

Well baby since I met you, I've never been the same
There's never been a woman made me feel this way
And I know days are harder, and i know things have changed
But baby goodbye you know i just can't say

Where'd all the love go
I need you to know
I'm singing out to you
Tell me there's something I can do

Chours:
Radio waves, can you hear me singing out
I've got something to say
Can't you hear i need you now
I'm calling on the two of us so we can be saved
Listen to my radio waves

Clear across the city, you're lying in your bed
Here I am regretting every word unsaid
The only way I know to help you understand
Is say what's going on the only way I can

Broadcast over FM
Here we are agian
I'm singing out to you
Tell me there's something we can do

Repeat Chours Twice

Listen to my radio waves

Love on the radio, Love on the radio
Love on the radio, Love on the radio
Love on the radio, Love on the radio
