Anywhere But Here

Rise Against

We've been alright up until now
But the air that we breathe is about to run out
We've rehearsed our lines clear and loud
But the cue never came and the lights they never went down
So we're passing the time while time passes us
The fast lane's a term never applied to us
Without a dime to my name or a prayer in the world
I walk out the door
Destination, anywhere but here
Away from you
Now I'm on my way to the other side
(On my way)
I'll forget everything I left behind
(On my way)
These empty rooms
(On my way)
Are still filled with you
(On my way)
So I dropped out of my own race
A race with no finish line no first or last place
These faces all rush right past me
I turn and walk away
'Cause we finally know now what our
Time here's about we were not meant to be
Another face in the crowd, we're a forest of lives
We grow tall and wide we'll never be cut down
Destination, anywhere but here
Away from you
Now I'm on my way to the other side
(On my way)
I'll forget everything I left behind
(On my way)
These empty rooms
(On my way)
Are still filled with you
(On my way)
I'm so tired and turned around and scared
And I'm lying in empty beds again
I'll wait for you to come to your senses, barbed wire fences

Won't keep me from breaking through, I swear I will to you
Now I'm on my way to the other side
(On my way)
I'll forget everything I left behind
(On my way)
These empty rooms
(On my way)
Are still filled with you
(On my way)
Are still filled with you
(On my way)
I'm so tired and turned around and scared
I'm lying in empty beds again, away from you
