Asphole (Electro Funkin Edit)

Pigface

a thin word
process mile union made
the snake defiled
blue book murder the best you could
lessons spite heaven twisted
candid photos intermixed in
sitting backdoor mud realized
dirty corners of the mind
whistler's father figure heads
sitting in eye and wasted
pick yourself up off the floor
shaken angel taken home
clicking heels gold brick road
no place like home it seems
now together shadow rithing
you world comes crashing down
rain - the gasping now
rain - the melting snow
rain - cold image much larger than life
rain - comes crashing down
rain - go pour it on
rain - forever you're left with this curse
so was it mud cracked corner smile
no living out the lie
motion vixen man so proud
seems so innocent inside
seems quite a horror show
treated like a child who knows
the mascot reveals the worst
tilted and hungry suicide...suicide...suicide! suicide!
suicide! suicide! suicide! suicide!
children went hungry
children went hungry
suicide
living in a dream
rain - this is your song (star?)
rain - it lingers on
rain - your royalty consumed by a vice
rain - done acid sound

rain - believe it all
rain - together you're left with this curse
go through the doorway world subjected
shrink away from those who see
needed wicked garden grows
slither down the asphole
looking backward of the form
as lightshow of your own device
back of penny torture matters
talking through a mere the says it all
finger asphole
love finger asphole [x3]
love finger the asphole [x2]
love finger [x4]
rain - the gasping now
rain - the melting snow
rain - cold image much larger than life
rain - comes crashing down
rain
