# When the Fire Goes Out

## Distant Sun

I don't want to talk about it but I've gotta get it off my mind
It feels like we're drifting and I don't know the reasons why
I thought I put a lot in to it but it's all been lost in time
I need to know, I need to know, I need to know, I need to know what's happening insideEverybody knows that when the fire goes out it's out forever
Take me back again to when it all burnt out so I'll remember
What caused my love for you to die
November's cold and so am IIt's 5 o clock on Sunday morning and our bed is cold like snow
You up and left without a warning as the rain crept down my window
I can't explain what's happening but I think I'm letting go
I tell you now, I tell you now, I tell you now, I tell you now, I didn't want to let it show thoughEverybody knows that when the fire goes out it's out forever
Take me back again to when it all burnt out so I'll remember
What caused my love for you to die
November's cold and so am IThe road ahead it may be lonely but it's the only road I need
and I know what is in front of me is a future of uncertainty
but I've turned the page and now it's over and I need you all to see
that I did the things I had to do to try and get it through to you but now I'm breaking freeEverybody knows that when the fire goes out it's out forever
Take me back again to when it all burnt out so I'll remember
What caused my love for you to die
November's cold and so am I
November's cold and so am I
