

Endorama

Kreator

This is the end of all life's suffering
This is the end of all life's pain
Fear, destruction, greed, exists no longer
Nothing's left now, nothing can remain
It's getting closer, follow my friend
Endorama is crushing you, this the end
Expect no mercy just understand
Endorama comes for you, this is the end
This is the end of your false paradise
This is the end of mankind's pride
Masques of selfishness needed no longer
All forgotten dark illusions died
It's getting closer, follow my friend
Endorama is crushing you, this the end
Expect no mercy just understand
Endorama comes for you, this is the end
As long as you're alive you've got to suffer
Death will take you from this labyrinth
(Endorama)
Open up you'll see, this life just can't be real
Don't look back just let it all go into Eden or inferno
This is the end of all your struggling
This is the end of this domain
Hate, regression, lies, exist no longer
As earth becomes the epitaph of Cain
It's getting closer, follow my friend
Endorama is crushing you, this the end
Expect no mercy just understand
Endorama comes for you, this is the end
This is the end, this is the end
Endorama is crushing you
This is the end, this is the end, this is the end
Endorama comes for you, this is the end
