Heaven Help Us

Cirith Ungol

As I gaze into my crystal ball, I'll tell you what I see
Slowly but surely it's genocide, the fate that we shall meet
We say we are the civilized, none as advanced as we
Seeking the knowledge of space and time
As we poison the earth, the sea and skyAll we see is the ground beneath our feet, never looking twice
Take a look around the world at all the ignorant sacrifice
Profit was the main thing on our agenda through all of the years
Never thought twice about a living thing or all of the future tears we'II cryThe fact is without a doubt
Our time is running out
Heaven help usTons of acid and toxic waste, are dumped in the air we breathe
Millions of barrel of nuclear waste, beneath the earth and sea
The price of pollution cannot be set, it's an unworldly cost
The damage is done and we cannot forget, the senseless
And needless loss of life
