Cheer Up!

A Great Big World

Cheer up!
'Cause nothing really matters when you look up into outer space
It's a great big world and there's no need to cryCheer up!
We're all interconnected to the reaches of the galaxy
And my best friend says he came from the sky
He traveled to the Earth aboard a pink spaceship,
It's hard for him to hide behind those eyesCheer up!
The atoms in your body are as old as every dinosaur
You're a special part of one big grand designCheer up!
We're all in this together to discover what we're living for
Thirteen billion years and there's still timeEvery night I wish upon a star so bright,
Waiting for the others to arriveCheer up!
'Cause nothing really matters when you look up into outer space
It's a great big world and there's no need to cry
Thirteen billion years and there's still time
