Dragonfly

Dust For Life

So stare into the sun, the fields are turning blue
It's clear to everyone who you've been talking toGo on, refuse to dream, cold world of endless needMy little dragonfly on dark wings, you come to meWaiting for the sun to shine, waiting for the light to find
And it's taking all I know, to give it up and let it go
No truth I can explain, no sense in talking to
Flames take another one, I see I'm smoking tooGo on refuse to see, in dark clouds the ravens weepMy little dragonfly on dark wings, you come to me
My little dragonfly on dark wings, you come to me
My little dragonfly on dark wings, you come to me
My little dragonfly on dark wings, you come to me
