Unconditional

Peter Andre

I was already there
Just in another place
Destiny hadn't brought us face to face
What i didn't realise
Is how you would change my life
Turn me from a boy to a man
Becoming a father before i became a dad
Wish i was there for your first breath
Wish i could've helped with your first step
But i'm here now
Unconditional love
I finally understand the meaning of it now
It's Unconditional
I pray that life will always treat you kind
Unconditional
How could a man not wanna claim his own
Leaving a mother to raise a child alone
Maybe it was destiny
Maybe you were made for me
With everything that comes along

Ill give you my word, ill take it on
Wish i was there for your first breath
Wish i could've helped with your first step
But i'm here now
Unconditional love
I finally understand the meaning of it now
Its Unconditional
I pray that life will always treat you kind
When the world doesn't see you like i do
I'll be the eyes that guide and see you though
In the night when you cry and you call out my name
Your realise there's love surrounding you
I was already there
Just in another place
Destiny hadn't brought us face to face
What i didn't realise
Is how you would change my life
Turn me from a boy to a man

Becoming a father before i became a dad
