On My Mind

Super Stereo

As I write you now
I'm 20 thousand light years from the sun
I'm reaching out for love
Tell me you're not goneIs it logical?
Will we stand the test of time?
In a thousand years or more will you be mine?
I know you've already gone but love is blindAlways on my mind
Fill our space with time
Look inside to find
You're always on my mindFaces fade away
All the places lose their names
But the one thing I recall is still ingrained
A love like ours could never fade awayAlways on my mind
Fill our space with time
Look inside to find
You're always on my mindWhoa Whoa (3x)I wanna know
How you lived your life
Did you find love after mine?
Which places did you find?
I hope you know you're always on my mindAlways on my mind
Fill our space with time
Look inside to find
You're always on my mindAlways on my mind
Fill our space with time
Look inside to find
You're always on my mindAlways on my mind, always on (repeat)
(Whoa whoa)
