These Nights

Given the Day

Rolling mountains, streets white and endless
Laughing, melting, lost all sense of time and the mindset
Helpless, but held it down, made our way across town
All the way to open fields, hoping we could open
Up till dawn, all night all day
Nights and mornings awake in our heads
We are stars in our each beautiful morning

Oh, these nights never end, no
Back on the fields, open grass laid out
Open field, home just a dot in the distance
Down that path we all came down
But you can't go back ever now
'Cuz the world saved the early days
Have gone away with the future

Everything we're changing with the moon and the sun
And we've been holding back way too long for this, holding on

Up till dawn, all night all day
Nights and mornings awake in our heads
We are stars in our each beautiful morning

Oh, these nights never end, no
Oh, these nights never end, no
Oh, these nights never end, no
Oh, these nights never end, no

Up till dawn, all night all day
Nights and mornings awake in our heads
We are stars in our each beautiful morning

Oh, these nights never end, no
Oh, these nights never end, no
Oh, these nights never end, no
Oh, these nights never end, no
Oh, these nights never end, no
