Sleep Machine

Classical Lullabies

Some things melt away
As night dissolves to day
Some things only stay
As silent darkness slowly kills me, ooh oohI turn to you
And stir your blank expressionYou're the one for me
Help me get to sleep
(Nighty-night goodnight)
Something isn't right
It seems that every night, I need youMore and more
You take me away
More and more
I need you to stayMore and more
Distract me from the instant lost of light
More and more
I need you tonightCome let's go for awhile
And pretend you're mine for awhile
Come let's go, yeahMore and more
You take me away
More and more
I need you to stayMore and more
Distract me from the instant loss of light
More and more
I need youGood night
