More Than Sorry

Ben Harper

Goodbye
Hasn't been so good to me
Stepped out into the night
Back against the moonI saw ten thousand hands with candlelight
We all think that we're right
It's hard to tell
If the night is full of hope or doomWhat more than sorry can I say
What more than sorry can I be
Before our love fades away
What more than sorry do you want from meMy eyes
Burn with unshed tears
My body is weak
From so many silent yearsToo many people say goodbye
Before they say hello
Step into the morning
And disappearWhat more than sorry can I say
What more than sorry can I be
Before our love fades away
What more than sorry do you want from meWhat more than sorry can I say
What more than sorry can I be
Before our love fades away
What more than sorry do you want from me
