Sister

Creed

Caught up in the middle
Had no choice, had no choice
Birthright forgotten
So silent, no voice
I see you, you know who
Little sister, little sister
Now realized little sister
Over looked little girl
Now realized little sister
Over looked little girl
Bottled up and empty holding back
At loss, your forgotten getting back, get back
Bottled up and empty holding back
At loss, your forgotten getting back
Get back, get back, get back, yeah
Expectations of another
Love given to the younger
Broken father, broken brother
Emptiness feeds the hunger
I see you, you know who
Little sister, little sister
Now realized little sister
Over looked little girl
Now realized little sister
Over looked little girl
Bottled up and empty holding back
At loss, your forgotten getting back, get back
Bottled up and empty holding back
At loss, your forgotten getting back
Get back, get back, get back, yeah
Now realized little sister
Over looked little girl
No direction little sister
Over looked little girl
Change
Change
Change
