Ascension

Born Of Osiris

It's just one more step
Are you giving up now
So close to knowing?
The only hope that's left
Has been taken from you
A new journey awaits youA new journey awaits you
Time to begin
A new journey awaits you
[No idea what this line is]
No one will ever break us
Or the experience
When you become an end
It counters certainty
You are left to witness
All of this on your own
You will fight the reasons
You're left to wonder whyEvery moment matters
You discover space
A shift in time is on it's way
To get away we'll have to change
Another hope is known to me
We're gonna have to find our own beliefsA new journey awaits you
Time to begin
A new journey awaits youLooking up to a new ideal
Where we all devote this
Of our surreal past it seems [not sure of this one either]
No thought has been noticed
Of our ascension
Of our ascensionThe transition has come
And like the dead courageous
You know what you can become
Our journey has just begun
