

# Ascension

## Born Of Osiris

It's just one more step  
Are you giving up now  
So close to knowing?  
The only hope that's left  
Has been taken from you  
A new journey awaits youA new journey awaits you  
Time to begin  
A new journey awaits you  
[No idea what this line is]  
No one will ever break us  
Or the experience  
When you become an end  
It counters certainty  
You are left to witness  
All of this on your own  
You will fight the reasons  
You're left to wonder whyEvery moment matters  
You discover space  
A shift in time is on it's way  
To get away we'll have to change  
Another hope is known to me  
We're gonna have to find our own beliefsA new journey awaits you  
Time to begin  
A new journey awaits youLooking up to a new ideal  
Where we all devote this  
Of our surreal past it seems [not sure of this one either]  
No thought has been noticed  
Of our ascension  
Of our ascensionThe transition has come  
And like the dead courageous  
You know what you can become  
Our journey has just begun
