Granite

PictoChat

You can hide your eyes, you can dim the lights
But they are watching
This is a new time with a different kind
They are the future, the only oneThis is the final call
For the setting song as they get closer
Now with a fall from grace
Thy will be done the show is over, it's a new dawnJust leave this place behind
A creative burst of light
They only wanted your laugh on demand
This is a better wayWe are standing by, no time to hide
No meeting half way
You were sucking life through the needles eye
This is a new day and they have wonWe will surrender now or be outdone
Left in the open
Its cooling of the risen
They are the future, the futureWhen all your fears combined
The method was refined
I know you really tried to understand
This is a new ageIt's a new dawn
