# Lamb

## Radionova

I have been here for so long
I've carried all the weight
'til something pulls me underneath the tide
Climb to where the air is thin
so I can breathe again
Still it makes me wonder deep inside
Nothing's free
We're all machines
No one bleeds
Shadows of you sins are following you

When it sucks you in, it's swallowing you
King of the mountain, that's what I am
Space between the world and me
Everybody's someone else's sacrificial lamb
defying gravity
Drink the chemicals we spill
'til something pulls me closer to the ground
While hell is freezing over, over
Our eye is on the kill
