Closer To You

Young Love

If I put my hand out
Would you put yours in mine?
All of our answers, question in time
Don't let your fears try to tear us apart
I want to get closer to you, I'm on the outside looking in
Tell me our love is real, you know that I will understand
I want to get closer to you, closer to you
I want to get closer to you, closer to you
This is bigger, bigger than you or me
(Bigger than you or me)
In these grains of sand waiting by the sea
We'll let the current wash us away, hey
I want to get closer to you, I'm on the outside looking in
Tell me our love is real, you know that I will understand
I want to get closer to you, closer to you
I want to get closer to you, closer to you
If I put my hand out
Would you put yours in mine?
(Don't let your fears try to tear us apart)
All of our answers, questions in time
(Don't let your fears try to tear us apart)
Closer to you, I want to get closer to you
Closer to you, I want to get closer to you, closer to you
I'm on the outside looking in, closer to you
I want to get closer to you, then I would know for sure, closer to you
I imagine how you feel, tell me the only thing that's real
If you would let me in, then I would know for sure
I imagine how you feel, tell me the only thing that's real
If you would let me in, then I would know for sure
