Boy Who Cried Thunder

Daniel Wilson

This boy's a great confusion
But he can know my name
This boy explore delusion
Maybe I know a way
I heard a little voice in my corner
I heard a little voice in my head
Tell me if the boy who loves you isn't well enough

The boy who cried a thunder
Then the rain with pain fell from his eyes
The boy who cried a thunder
Then the rain with pain fell from the skies

This boy's in great condition
But he can know my name
Maybe we've learn precision
And the boy will know a way
I heard a little voice in my corner
I heard a little voice in my head
I heard a little voice in my corner
I heard a little voice in my head
Tell me if the boy who loves you isn't well enough

The boy who cried a thunder
The boy who cried a thunder
