It's Here

40 Winks

I've been looking all around the world to see what I could find
Just a lot of broken promises and people left behind
Oh and the pain of being lonely is what everybody fears
Yeah, it took a lot of time for me to realize
It's here, looking me in the eye
It's here, here all the time
It's here, I've always tried to find a way to go
But now I know, it's here
You can spend your life competing in a world that talks too loud
You can lose your own direction getting lost among the crowd
Confusion is it any wonder that the road ahead's not clear?
Well you can try too hard to find it, now I realize
It's here, looking me in the eye
It's here, here all the time
It's here, I've always tried to find a way to go
But now I know, it's here, it's here
And now it's like one search that's come to an end
And I knew if there's a place for me
I know it's here
It's here, looking me in the eye
Well it's here, here all the time
It's here, I've always tried to find a way to go
But now I know, it's here, it's here
I've been looking all around the world
It's here
And it took some time to realize
It's here
Is it any wonder that the road ahead's not clear?
It's here
