Coming Home

Iron Savior

Lost in the dark millenniums ago
Where is the place? Where's the place called home?
On fire they rode to flee from the fall
Their future was doomed, they've foreseen it allMythical world of the ancient empire
Secret and hidden but some day we shall returnAncient calls from somewhere in time
We have to follow the sign
Distant voices, sources unknown
Where to they lead us? Where will we go?
On the scent for the lost coming homeChasing a shadow in stardust and haze
Where will we find traces of our race?
The engines are roaring, we're leaving ground once more
Is it for real? Will we fail like so often before?Ancient calls from somewhere in time
We have to follow the sign
Distant voices, sources unknown
Where to they lead us? Where will we go?
On the scent for the lost coming homeMythical world of the ancient empire
Is it for real? Will we fail like so often before?Ancient calls from somewhere in time
We have to follow the sign
Distant voices, sources unknown
Where to they lead us? Where will we go?
On the scent for the lost coming homeStar of the old
Guide us, give us hope
Star of the old
Guide us, give us hopeStar of the old
Guide us, give us hope
Star of the old
Guide us, give us hope
