When I Found You

Jerry Reed

I was a lonely little fellow
Just as lonely as I could be
I was a lonely little fellow
Lonely as I could be
I used to sit alone at home
And wish a gal would come and call for me
Yeah, but not anymore, not anymore
Since I found you, it's a different score
Since I found you, yeah, since I found you
All my dreams come true
Honey baby, when I found you
When I found you, ooh!

Well, didn't have no one to love me
Nobody I could call my own
Didn't have no one to love me
Nobody I could call my own
No, I didn't have no one to care
Used to spend my evenings all alone
But when I found you, when I found you
I knew my days of being all alone were through
When I found you, when I found you
All my dreams come true
Honey baby, when I found you, you
When I found you, ooh!

Well, well, well, well, well
When I found you, when I found you
I knew my days of being all alone were through
When I found you, when I found you
All my dreams come true, honey baby, when I found you
