

# Forever Be

[Kelis](#)

How people hold their breath  
Keep it in, waitin' for a sign  
Can't let it out till none is left  
And night comes on and the moon is high We are here, you and I, just in time,  
To tell a fire tell a secret, here's mine  
I was scared, terrified, of the lines  
That I might forget to sing to you tonight There will never be another day for us to be purpose  
I'll follow your lead, together, and we'll forever be  
We'll forever be How people lose their step  
Tryna find their way in troubled times  
Holding on till promise's kept  
Let's go down, and my heart is blind We are here, you and I, just in time,  
To tell a fire tell a secret, here's mine  
I was scared, terrified, of the lines  
That I might forget to sing to you tonight There will never be another day for us to be purpose  
I'll follow your lead, together, and we'll forever be  
We'll forever be  
There will never be another day for us to be purpose  
I'll follow your lead, together, and we'll forever be  
We'll forever be  
There will never be another day for us to be purpose  
I'll follow your lead, together, and we'll forever be  
We'll forever be
