Make It In Love

Javier Colon

How would you know how far you can go
Unless you crash and burn
Throw away your heart and put it on the line, oh
Guess it depends on how much you want it
Sometimes it's easy but sometimes
If you just fall with it you'll findIf you wanna make it in love
You gotta be ready to give everything
If you wanna make it in love
You gotta take risks with your heart
It's easy to love when you've never been hurt
And it's easy to hurt when you've never been loved at all
You gotta be willing to fall
So you can make it in loveIs it smart to be vulnerable
When someone else decides if you'll be all but doubt
That's a choice, that you'll have to wait
Maybe it's not the safest thing
But do you really wanna be safe amidst the tests that come your wayIf you wanna make it in love
You gotta be ready to give everything
If you wanna make it in love
You gotta take risks with your heart
It's easy to love when you've never been hurt
And it's easy to hurt when you've never been loved at all
You gotta be willing to fall
So you can make it in loveDon't say goodbye before you try
Be willing to do whatever
It's worth the time to make the climb
So you can grow together
Forget the past, this love can last
Call it a new beginning
No need to ask, 'cause I'm telling youIf you wanna make it in love
You gotta be ready to give everything
If you wanna make it in love
You gotta take risks with your heart
It's easy to love when you've never been hurt
And it's easy to hurt when you've never been loved at all
You gotta be willing to fall
So you can make it in love
