Walk

í••ë¥¸

I thought that you would be the one to share my life,
I thought that you would be the one to stand here by my side,
I thought that you would be the lover I'd always dreamed of,
I thought that you would be the one to face and fight any storm,
What a fool I've been,
Nothing's quite the way it seemed,
All I've lost is all I had and all I had I never found,
So walk right out of life,
Enjoy your independence and freedom,
How can you still be proud,
When you've broken your vow,
Just turn away don't look back,
The love you promised taught me a lesson,
I know I'll survive after you have walked out of my life,
I can't believe behind your smile there lived a lie,
I can't believe inside your heart our love had already died,
I can't believe that I've been chasing something I'd never see,
I can't believe I've been the reason for your choice to be free,
How I've lost my way,
How overnight feelings change,

'after all this time you tell me you never felt the same way,
So walk right out of life,
Enjoy your independence and freedom,
How can you still be proud,
When you've broken your vow,
Just turn away don't look back,
The love you promised taught me a lesson,
I know I'll survive after you have walked out of my life,
Justify giving love that you never had,
Justify taking love when you never cared,
Though it's over now, though it's over now,
Love won't deceive me again,
So walk right out of life,
Enjoy your independence and freedom,
How can you still be proud,
When you've broken your vow,
Just turn away don't look back,
The love you promised taught me a lesson,

I know I'll survive after you have walked out of my life
