Tearjerker

SKC

Picture's on the wall, just waiting there to fall
Still remind me
That painful holiday, can almost hear you say
"Please don't miss me too long"
What did I do wrong? Could've sung a different song
You were my tune
Make my heart believe, a want is not a need
And I'm all right without you
The days go by, the nights don't change
The stars still spell out your name
I will wait for you

The world has let me down, is it you're just not around?
I've lost my reason
All the memories, every smile you gave to me
You can keep them
The days go by, the nights don't change
The stars still spell out your name
I will wait for you, I will wait for you
I will wait for you, I will wait for you
I will wait for days go by and still I will wait for you
