Ode

Tucker Tota

Hang me, watch awhile
Let me see you smile as I die
Take me as my body burns
Let me see you yearn while I cry
One step on your own and you walk all over me
One head in the clouds, you won't let go, you're too proud
One light to the blind and you walk all over me
One touch on the head an' you believe
Adore me as I drift away
Let me hear you say, I'm fine
You cry as my body dies
All that you despised is gone away
One step on your own and you walk all over me
One head in the clouds, you won't let go, you're too proud
One light to the blind and you walk all over me
One touch on the head an' you believe
We believe
[Incomprehensible]Yeah
One step on your own and you walk all over me
One head in the clouds, you won't let go, you're too proud
One light to the blind and you walk all over me
One touch on the head an' we believe
We believe
