Human Spirit

Subconscious

The world kept moving and you stood still
Caught in a moment against your will
And I think of you
Tonight
The world kept going and nobody could see
The hell that was happening, to hard to see
And I'll shed a tear
For you
No matter how many bombs we've dropped
No matter how many wars we've fought
It's good to see that it's not dead
Human spirit
Is alive and well
The people couldn't get it they said it wasn't true
How could this happen, happen to you

But we'll try our best to be home
For Christmas
And all the while we're still thinking bout ourselves
Worrying bout money and stressing about wealth
But there much more much more
To live for
No matter how many bombs we've dropped
No matter how many wars we've fought
It's good to see that it's not dead
Human spirit
Is alive and well
Human spirit
Is alive and well
Human spirit
Is alive and well
