A Better Nothing

Lostprophets

A dark place in the light in this city
I know this feeling I keep buried inside
Won't retreat or delete, it ends tonight
Oh, the dull pain that remains isn't pretty
I'm being smothered by the flames I ignite
Oh, my city is burning tonight
So how's it gonna feel when I leave this town?
Broke and burnin' with the memories that we once found
I'm out of time and I'm, I'm out of place
And I, I left a love I can't replace
To find home
Yet every time I'm left with nothing
Home
But nothing's all I need
To find home
Another time, there's always something
Home
But never inside me
My chest tightens, it brightens the light of the stars
Revealing our scars, all the times that were ours
On the run with nothing
But an appetite for lust and seduction
I won't start again with the feelings
I know what I need and it's so unappealing
I sink below, let me go
I need to find my way back to what I know
So how's it gonna feel when I leave this town?
Broke and burnin' with the memories that we once found
I'm out of time and I'm, I'm out of place
And I, I left a love I can't replace
To find home
Yet every time I'm left with nothing
Home
But nothing's all I need
To find home
Another time, there's always something
Home
But never inside me
So how's it gonna feel when I leave this town?

Broke and burnin' with the memories that we once found
So how's it gonna feel when I leave this town?
How's it gonna feel, how's it gonna feel, when I leave?
So how's it gonna feel when I leave this?
So how's it gonna feel?
To find, to find, to find, to find, find
Home
Yet every time I'm left with nothing
Home
But nothing's all I need
So how's it gonna feel when I leave this town?
How's it gonna feel when I leave this town?
How's it gonna feel when I leave this town?
How's it gonna feel, how's it gonna feel?
When I leave, when I leave
When I leave, when I leave
When I leave, when I leave
When I leave, when I leave
When I leave this town
