Modulation

Pleiadians

In order to say thank you to you
I must do it intentionally
But tonight with every breath
I can feel my death sure as I can feel my kneesAnd you were my modulation
So that's what you will always be
We took each other higherWe set each other free
We set each other free
We set each other free
We set each other free
We set each other free'Course neither of us were wearing helmets
And our blood was just everywhere
And when the morphine kicked in later
The censors threw their hands up in despairAnd that's when the truth came marching in
And promptly pulled the plug
But you were better than any drug
You were better than any drugIn order to say thank you to you
I must do it intentionally
But tonight with every breath
I can feel my death sure as I can feel my kneesYou were my modulation
And that's what you will always be
We took each other higherThen we set each other free
We set each other
We set each other
We set each other free
