Like I Never Loved You at All

Take That

Where, where are the stars?
Ones that we used to call ours
Can't imagine it now
We used to laugh till we fell down
Secrets we had, now in the past
From somethin' to nothin', tell meHow did we lose our way?
It's hard to remember all that we shared
Now we both have separate lives
From lovers to strangers, now alone
There's no one catchin' my fall
No one to hear my call
It's like I never loved you at allNow you're so far away
And I see our star is fadin'
One, too many times
Guess it just got tired of waitin' around
The nights that we thought if these walls could talk
From somethin' to nothin', tell meHow did we lose our way?
It's hard to remember all that we shared
Now we both have separate lives
From lovers to strangers, now alone
There's no one catchin' my fall
No one to hear my call
It's like I never loved youSo now does he give you love?
Oh, is it only me now that's thinking of
What we had and what we were?
Oh, did you ever care? Baby, was I ever there?How did we lose our way?
It's hard to remember all that we shared
Now we both have separate lives
From lovers to strangers, now aloneTell me how, did we lose our way?
It's hard to remember all that we shared
Now we both have separate lives
From lovers to strangers, now aloneThere's no one catchin' my fall
No one to hear my call
It's like I never loved you at all
It's like I never loved you at all
It's like I never loved you at all
