

Science

Pete Flux & Parental

[Scratched:]

This is the scientific extra-prolific terrific
Mystic simplistic metaphysic, no gimmick type lyric

[Verse:]

I'm a giant ball of energy, messing up your sensory perception
With superior depth in memory
Didn't have to go to med school at Emory
To know that you fools can't fuck up our team chemistry
Killing emcees and showing em no empathy
You're seeing the team operating at max entropy
And we'll continue to do so
It's proven that you slow
Don't matter who you know
Got you coppin' son like David Caruso
Expecting all the crazy hate cause my bars radiate
We keep going back and forth like a great debate
But on the same team shitting on your lame dreams
With as many flows as the genome's genes
That totals bout twenty thousand
Your women, we just aroused em
You niggas have just been outdone
Our figures more than a thousand
You losing so is the outcome
We're not the type to be outrun
Roadrunner times two on rhyme crews
Hip hop hero, you absolute zero
Fuck do you tell them niggas that are hellbent?
Spitting flows so hot they're measured in Kelvin
How do I do it so easy?
Channel legends up in heaven, then I repeat
Not an ankle in this, wait till I get knee deep
Pete Flux and Parental, welcome to the EP

[Hook:]

Prepare to witness an incredible alliance!
We long range and you short like an appliance
Why they into us? Probably the defiance

I don't know, we ain't Incubus yo, it's just science!

It's just science (x2)

Prepare to witness an incredible alliance!

We long range and you short like an appliance

Why they into us? Probably the defiance

I don't know, we ain't Incubus yo, it's just science!

It's just science (x2)

Nigga it's just science
