33

Tuamie

Now that we've found our place here
Today, I will follow you anywhere
And I, saw a smile upon your face
And the wind still blows and that won't change
And the sun goes down but we remain here
Just like, just like, just like we always have.
Just like, just like, just like we always have.

All our friends have passed, away
And all our lines (?) have slept, for days
And we can walk into, the world
And the wind will blow and that won't change
And the sun goes down but we remain here
Just like, just like, just like we always have.
(repeat until fade)
