Badd Business

Phantom Planet

So you've been trying to get ahead
But coming out empty handed
Losing all those friends you made insteadOh you pushed your way up to the top
You got so tall you had to stop
Did you squint to see who you were stepping on?It's your secret to the success
That's causing such a mess
And to be honest forgetting all of us
Now that is just bad businessNow, you think you're worth your weight in gold
While everybody's looking like the color of money
We knew you when and we don't really think it's funny, okayI'm just hoping for that day when
Your business life comes to an end
Deal with us just like people againBut you're just scheming on success
And only coming up with meager messiness
Oh yeah well, you can sell, sell, sell
And never do well when dealing in bad businessIf you're planning to invest
Well, any day now we'll be coming to collect
Oh yeah well, you can sell, sell, sell
And never do well when dealing in bad businessYeah, bad business
It's a disease the way that greed and excess spreads
(Bad business)
You never know, I could be next
(Bad business)
