Visions

The Brief Encounter

Embers ignite once again
I watch them dance around the flames
Sparks start to fly, I can't speak
From seeing answers that I seek
Shapes start to form as I stare
The shadows taunt as if to dare
Your sweet embrace takes my heart
Now I surrender and it starts
Visions in the night show me what is right
Help me through the maze of mystery
I would sell my soul if only I could know
What the future holds and what will be
Slowly my hand turns the page
It never ceases to amaze
Fill me with hope if you can
I will become a better man
Visions in the night show me what is right
Help me through the maze of mystery
I would sell my soul if only I could know
What the future holds and what will be
Visions come into my mind
Foretell the future of mankind
Only time will prove that I'm right
Will my words come true?
I can't deny the gift of foresight
There's nothing I can do
Through the night
Premonitions running wild
I can see them now
All alone I fantasize
As the daylight breaks through the stars
I wonder how I got this far
As I leave my room and lock the door
I know I live forever more
Visions in the night show me what is right
Help me through the maze of mystery
I would sell my soul if only I could know
What the future holds and what will be
Visions in the night show me what is right

Help me through the maze of mystery
I would sell my soul if only I could know
What the future holds and what will be
Don't mean that hope is you live
