Blame

Sevin

A lie is like a dirty knife
A jagged blade
And I can feel it in my spine
Deceiver
Your tongue is going to get pulled out
Your quick lips sealed
And I am going to shut your mouth
Forever
It's always your fault, And it's my fault
You won't change, I won't change
What's your problem, You
You won't listen to me, You keep pushing
Blame is a dangerous game to play
Better watch who you betray
Because I won't take your blame
Blame will chase you down someday
And will not fade away
There will be hell to pay
When I come back to find you
I'll show what happens when you blame
I know want to run and hide
You scared stiff snitch
Nowhere you can go this time
It's over
It's always your fault, And it's my fault

You won't change, I won't change
What's your problem, You
You won't listen to me, You keep pushing
Blame is a dangerous game to play
Better watch who you betray
Because I won't take your blame
Blame will chase you down someday
And will not fade away
There will be hell to pay
When I come back to find you
I'll show what happens when you blame
I know I'll come back to find you
I'll show you what happens when you blame

Blame is a dangerous game to play
Better watch who you betray
Because I won't take your blame
Blame will chase you down someday
And will not fade away
There will be hell to pay
When I come back to find you
I'll show what happens when you blame
Blame is a dangerous game to play
Better watch who you betray
You will have hell to pay when I find you
I'll show you what happens when you blame
