The Experiment

Robert Holmes

Action speaks loud, louder than any word
You need to watch it all, you need to learn It all
False smiles, all hypocrits
You know you paying all you need to watch your back
Do you think he's cured
Do You think he's sane
Do you think he's free
Do you think at all?
Being you and not being me
Is this way to cure a life so obscured?

Experiment from the governament
It's a moral sin of our society
Experiment from the government
It's a moral sin of your society
They're feeding lies to an empty mind
A mind impelled to be good
A chemical war inside - no choice no more
An human guinea pg - no choice no more
He ceases to be a man - no choice no more
He has no choice no more - no choice no more
