RazzTheMad

Let's put some miles between us
And everything that comes between us
Let the spirits lead us
And the hunger feed us
Live by the morning light
Empty days and fill the nights
Never say our goodbyes
Never lay down and die
And now we're looking for a way out
Even the closest stars
Are still so far
The only thing that tomorrow brings is that it will become today
On a night full of whispering don't let your hopes get carried away
Petty crimes they were just for show, now you're waiting for the trouble to blow over
You've got nowhere to go, you've got nowhere to go 'cause you're already home

And now we're looking for a way out
Even the closest stars
Are still so far
Some people say it's never enough
Some people say what they mean
Some people say that they've had it tough
Some people live in the dream
Some people live like slaves to money
Some people live on their knees
If you want to live to taste the honey
Don't go kill all of the bees
And now we're looking for a way out
Even the closest stars
Are still so far
Are still so far
Are still so far
Are still so far
